

# WEFA WF-608 MOST Interfaces

## 1. Introduction

The WF-608 MOST Series lets you connect Bluetooth devices to your original car radio, providing High quality music playback and simple menu based control through your radio. It can also provide you A2DP music streaming and hands free functions which integrates to your original steering wheel buttons.

## 2. Package Content

- Wefa Most Module
- Optical cable kit (MOST)
- Power harness
- Microphone

## 3. Installation

Please Note: Installation of the WEFA MOST interfaces is very complex, Therefore please have it installed by a professional installer.

## 4. Bluetooth Streaming

Wefa Most Interface lets you connect your Phone to your original car audio, providing music playback and menu based control through your vehicle's entertainment system, using the original controls of the car stereo.

The WEFA WF-608 also offers Bluetooth connectivity for A2DP music streaming and hands free mobile call handling via the original buttons and screens of your vehicle.

## 5. Handsfree Calls

Wefa MOST interfaces included microphone and possibility to Manage your calls through radio/steering wheel buttons gives you total control over and road while receiving or making calls on the road. The music streaming automatically stops and the call is audible through the car-speakers.

- When the phone rings, there are two control methods to Accept
- With the "previous track" button on the original steering wheel
- With the "previous track" button on the car radio

- When the phone rings, there are two control methods to Decline
- With the "next track" button on the original steering wheel
